FACTOR4

beauty comes from within

Factor4 is highly concentrated and super-rich serum containing 4 times more growth factors than any brand Blood Rich Injection product.

Factor4 is autologous (harvested from the body's own substances) and depending on the patient's needs is used to reinvigorate skin quality and treat both wrinkles and crepiness in areas of the face, neck, décolletage, back of hands, dark eye circles, stretch marks and scars with bonus effects of a significant reduction in static face lines and tightening of the skin.

Factor4 is generated by encapsulating venous patient blood in technologically advanced tubing. The drawn blood is incubated for between 6 and 9 hours exposing the blood to pyrogenic free surfaces eliciting a vigorous and rapid increase in the synthesis of growth factors. Following centrifugation, serum extraction, and filtration the serum is portioned and reinjected or stored at -18° Celsius for future convenient use.

A **Factor4** treatment naturally stimulates collagenases significantly slowing down the skin's aging process, reducing fine lines and wrinkles and improving the overall skin's texture. **Factor4** also contains anti-inflammatory proteins reducing downtime. Patients can expect to start seeing results after a couple of weeks from the first treatment. 3-4 treatments one to two weeks apart is suggested treatment protocol for the most beautiful results.
